Luka Herceg

QA Engineer / Backend JAVA developer

My professional experience is rooted in **Java** development, with a strong emphasis on **backend engineering** using the **Spring Boot** framework. I have been actively involved in building scalable systems and APIs, with an in-depth understanding of the Java ecosystem.

A significant part of my career has been dedicated to **QA automation and software testing**. I've worked extensively on designing and maintaining test frameworks, writing automated tests, and integrating testing into CI/CD pipelines using tools like **Jenkins** and **Git**. This experience has given me a solid foundation in both development and quality assurance.

I have also explored **Python** through scripting and **Django** web applications, expanding my knowledge beyond the Java world. While my Python expertise is still growing, I continually build on it through side projects and automation tasks.

Currently, I'm working toward becoming a full-stack developer. While backend remains my core strength, I have hands-on experience with **HTML, CSS, JavaScript**, and **React**. I'm also pursuing an **AWS Certified Cloud Practitioner** certification to deepen my understanding of cloud services.

Work history

QA Engineer
September 2015
June 2025

Ericsson Nikola Tesla, Zagreb

Software Developer focused on testing and development.
Primarily worked with **JAVA** and the **Spring** framework for various projects, facing new challenges on every assignment. Additionally, I utilized **Git** for version control across all projects and frequently employed scripting languages like **Bash**, **PowerShell**, and **Python** for automation and testing tasks.

QA Engineer
June 2025

Happening, Zagreb

Education

Univ. bacc. ing. el. techn. ing.,
September 2010
September 2013

FER (University of Zagreb, Faculty of Electrical Engineering and Computing), Zagreb

Master of science in information and communication technology
June 2013
June 2015

FER (University of Zagreb, Faculty of Electrical Engineering and Computing), Zagreb
